

Caribou,

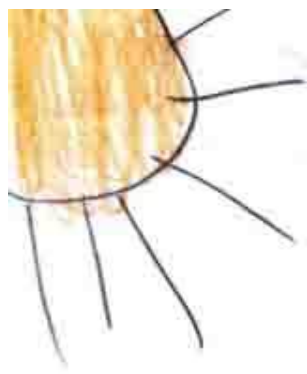

Bears, and

Wolves.

By J.J.

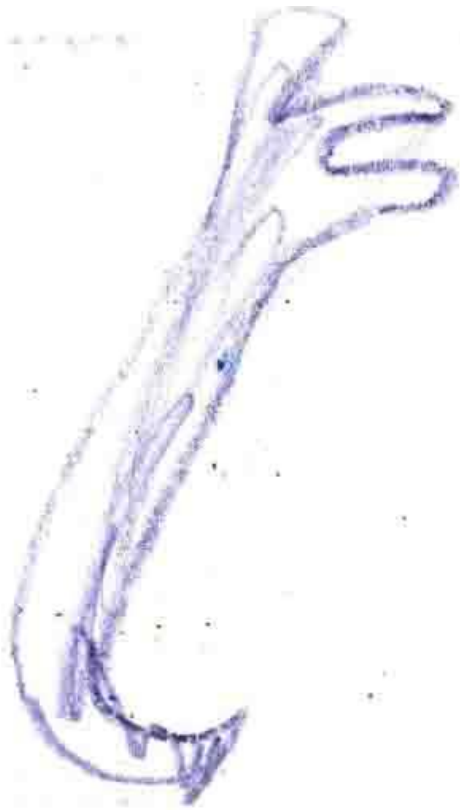

Chapter 1

Caribou

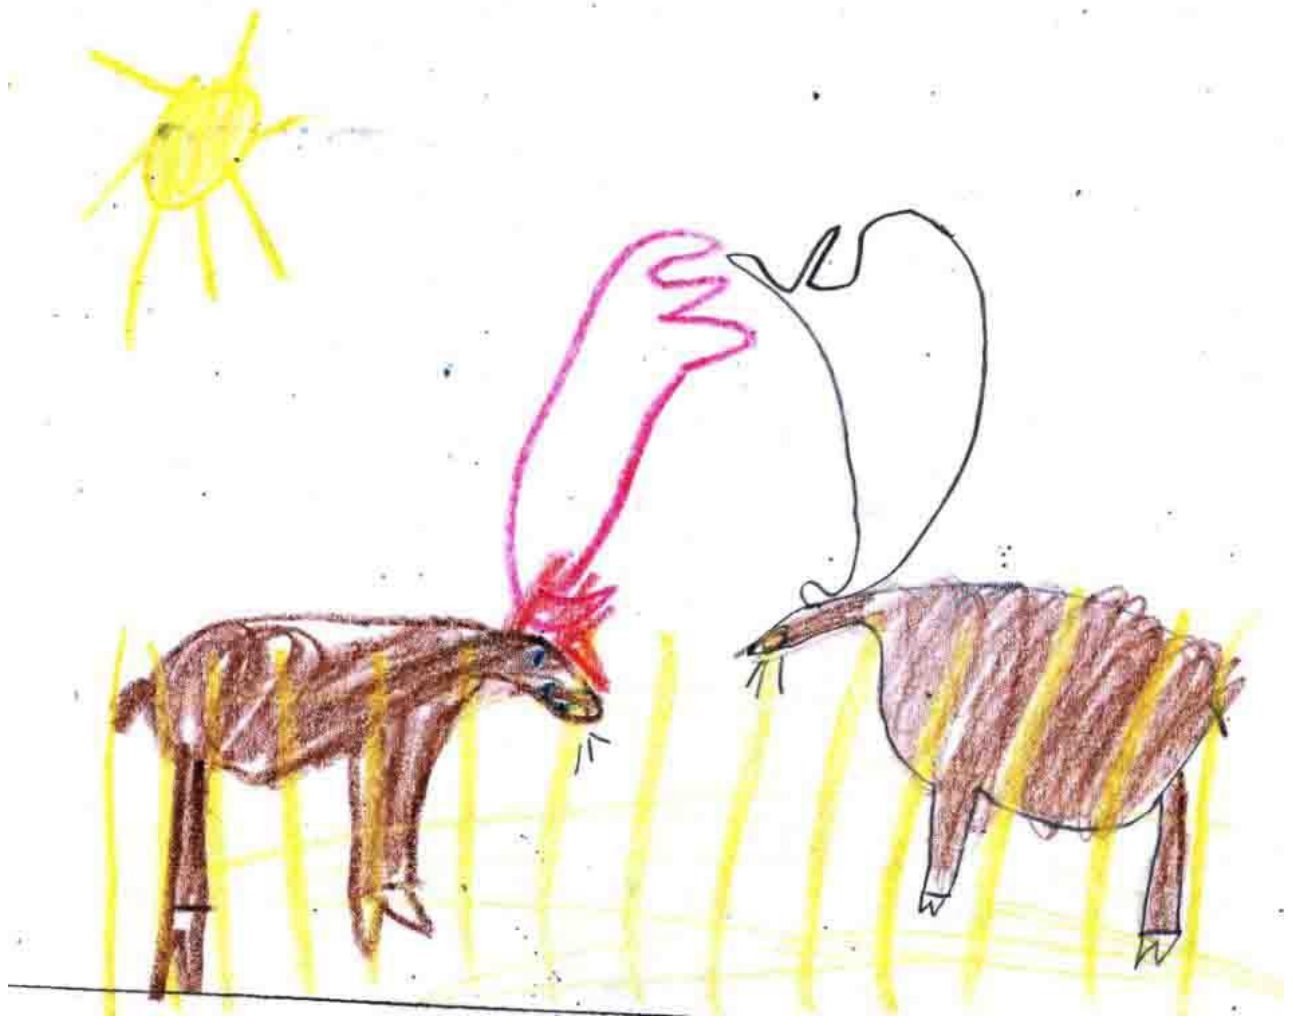

Caribou are my favorite animals because they have big antlers like moose.

Did you know that their antlers are taller than us. Caribou can run fast.

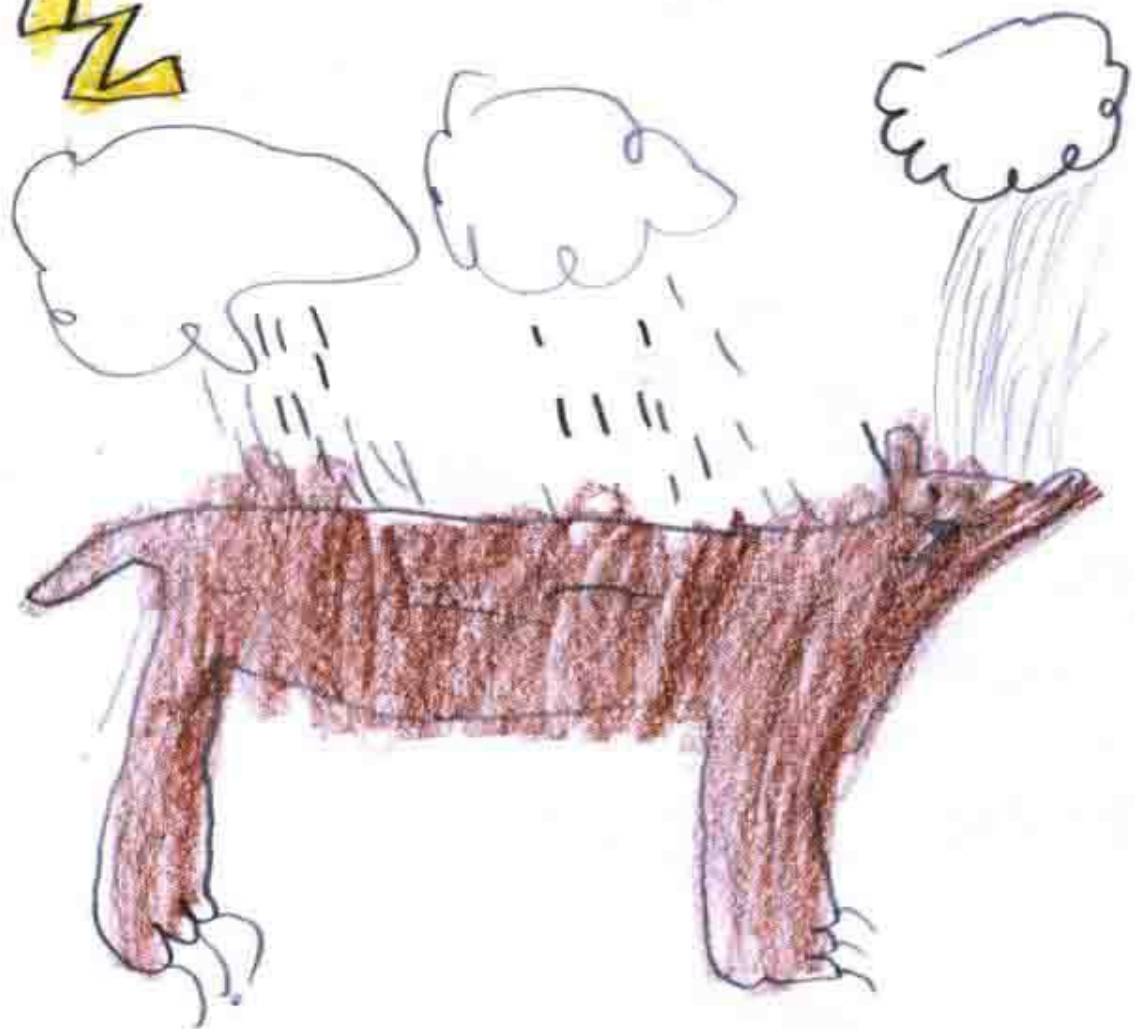

Caribou fight in the fields.
There are herds of caribou. The
leader is the boss.

Caribou telling is over, bye bye.

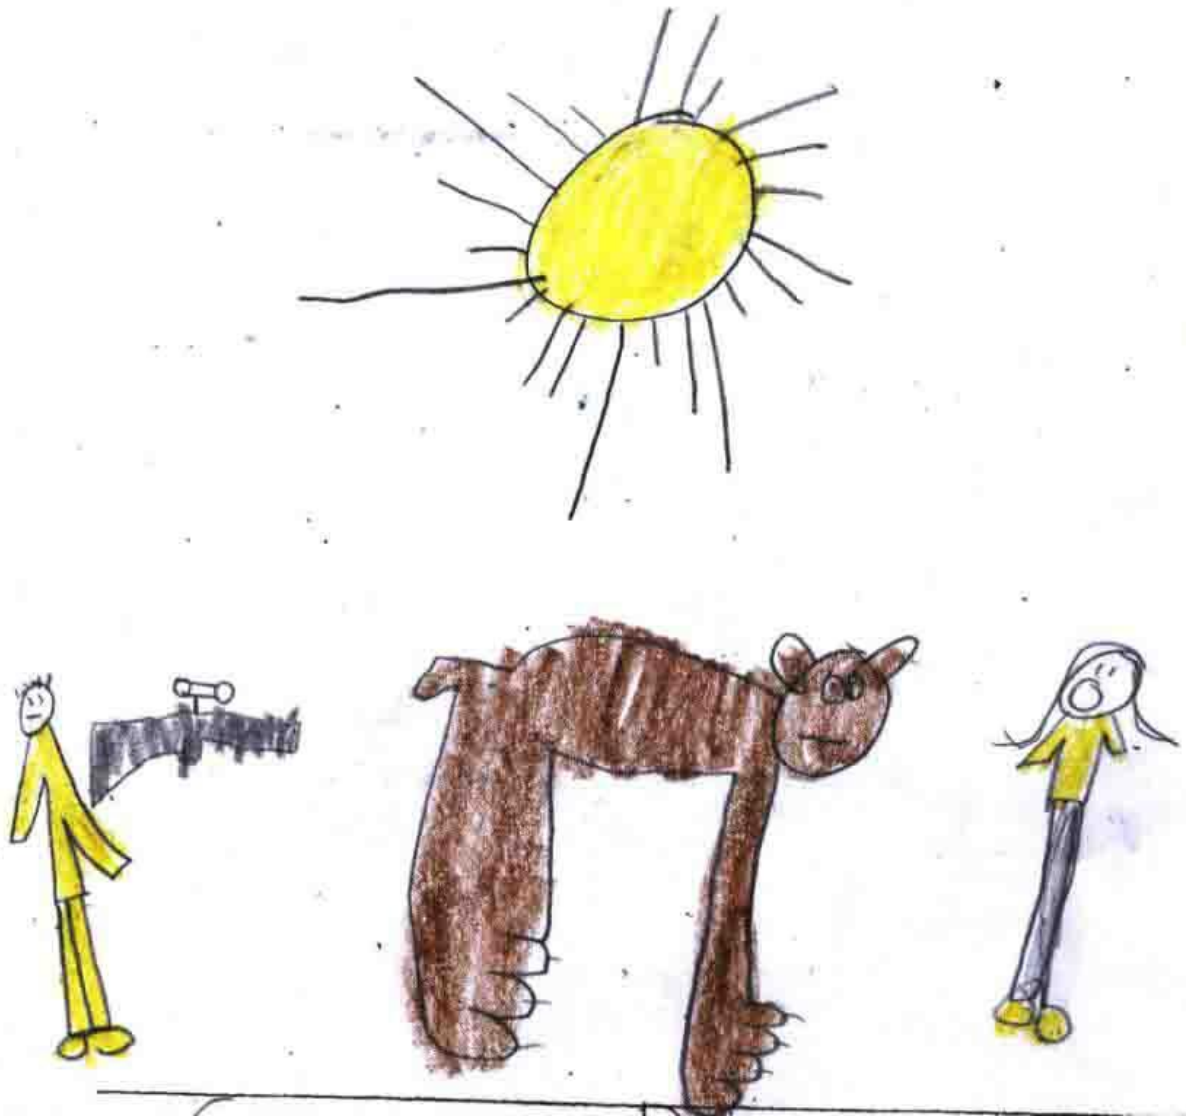

Chapter + wo

⚡ Bears

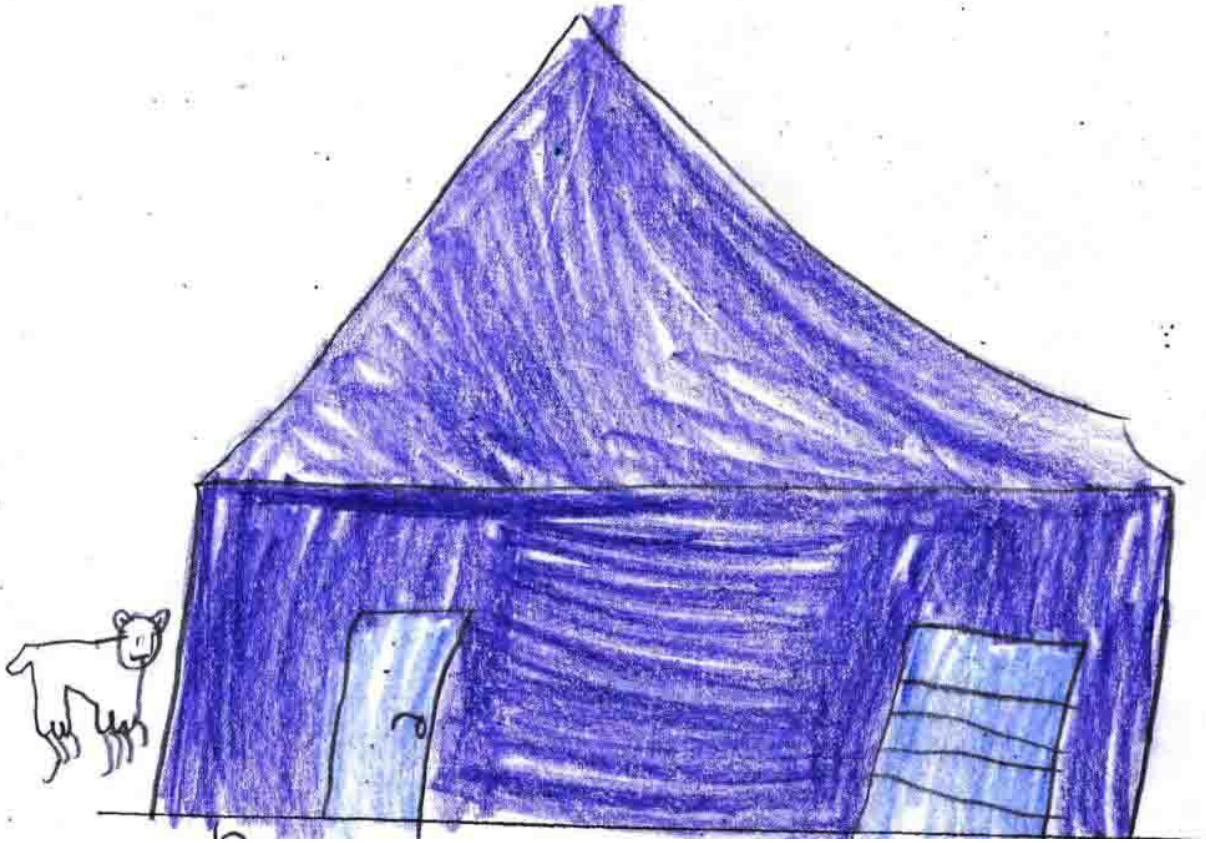

Bears are my favorite animals. They are mean. Bears can get into your tent and food. Watch out for bears.

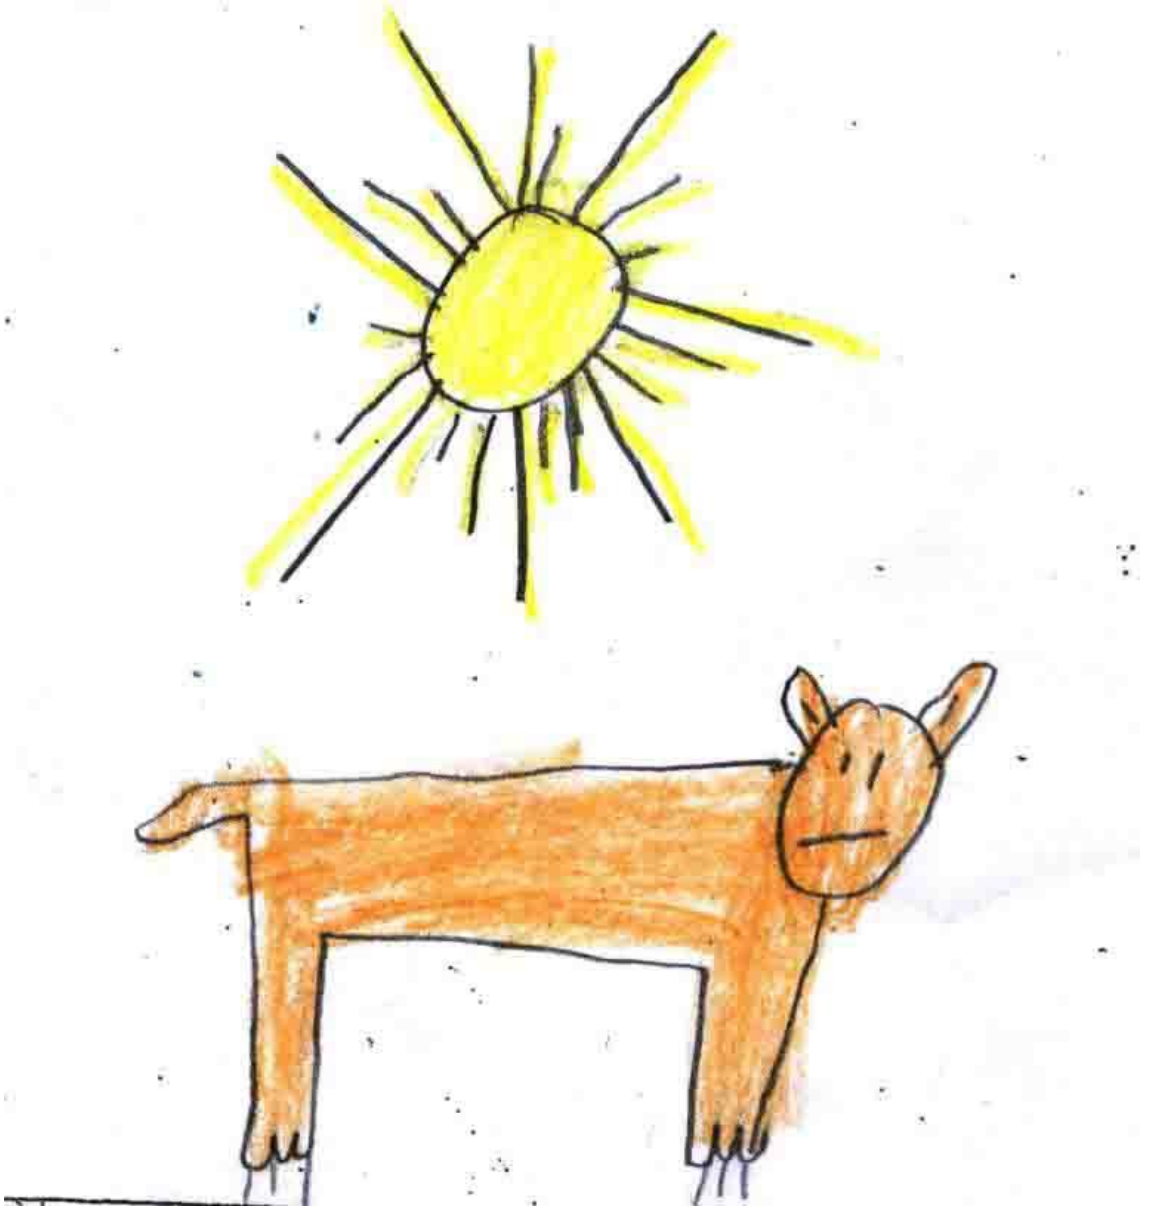

Grizzly bears are mean bears.
They can kill people. We don't like
those kind of bears.

Bears have been hunted a long time, even sun, black, and brown bears. Bears also can break into a house.

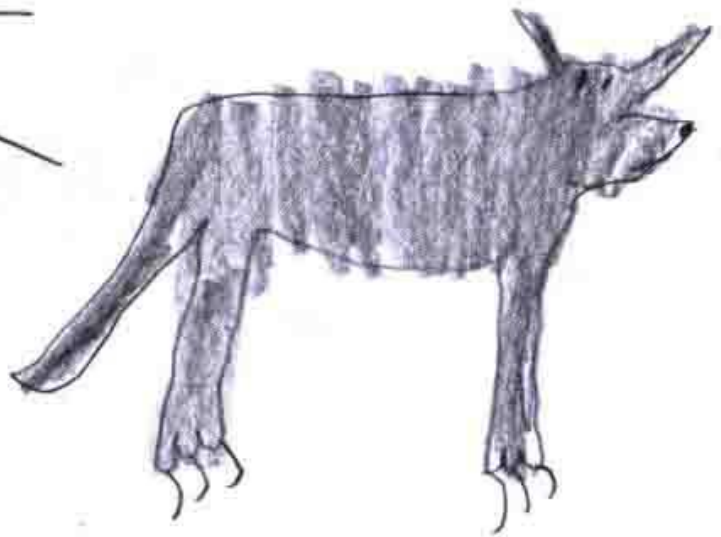

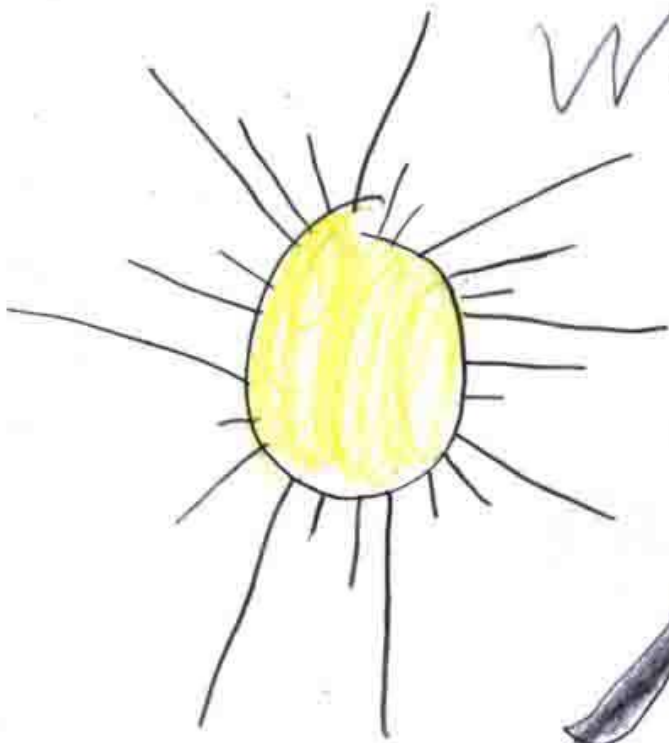

Bears are mammals. They hunt prey in the dark.

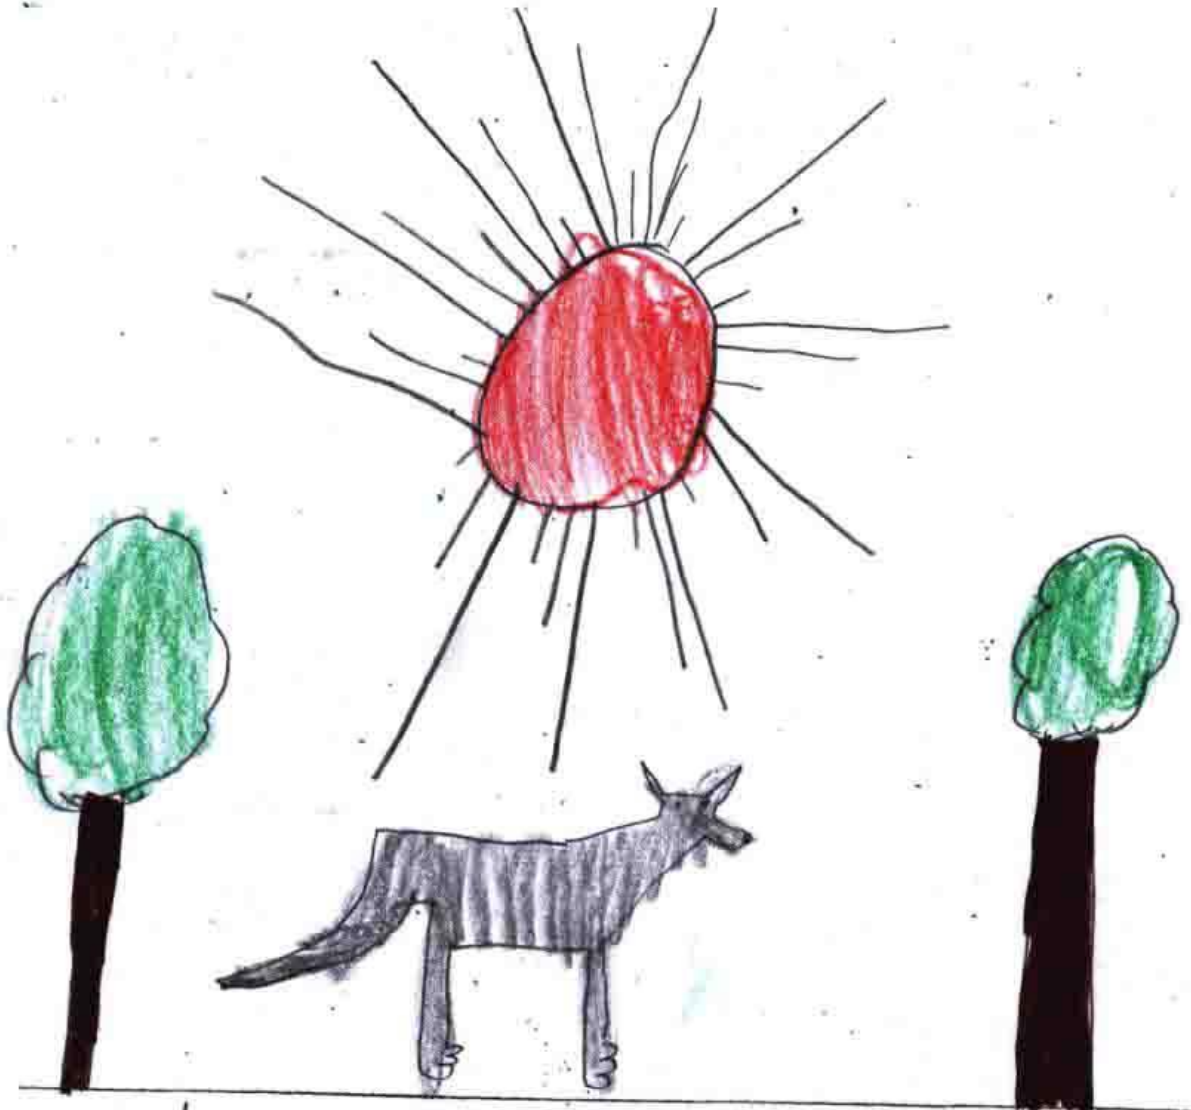

There is no more bear telling
anymore, bye.

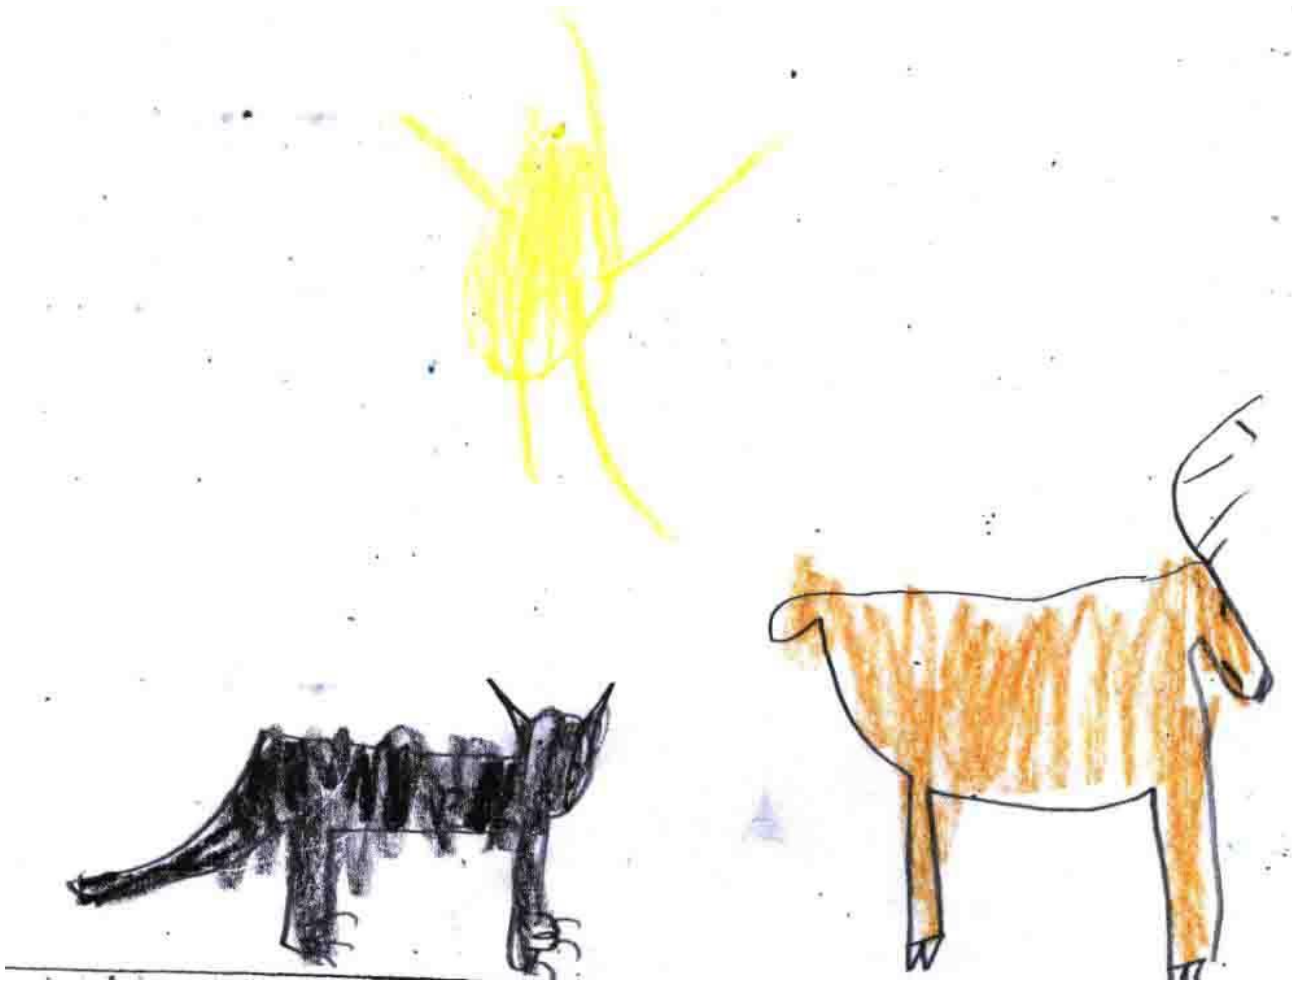

Chapter Three

Wolves

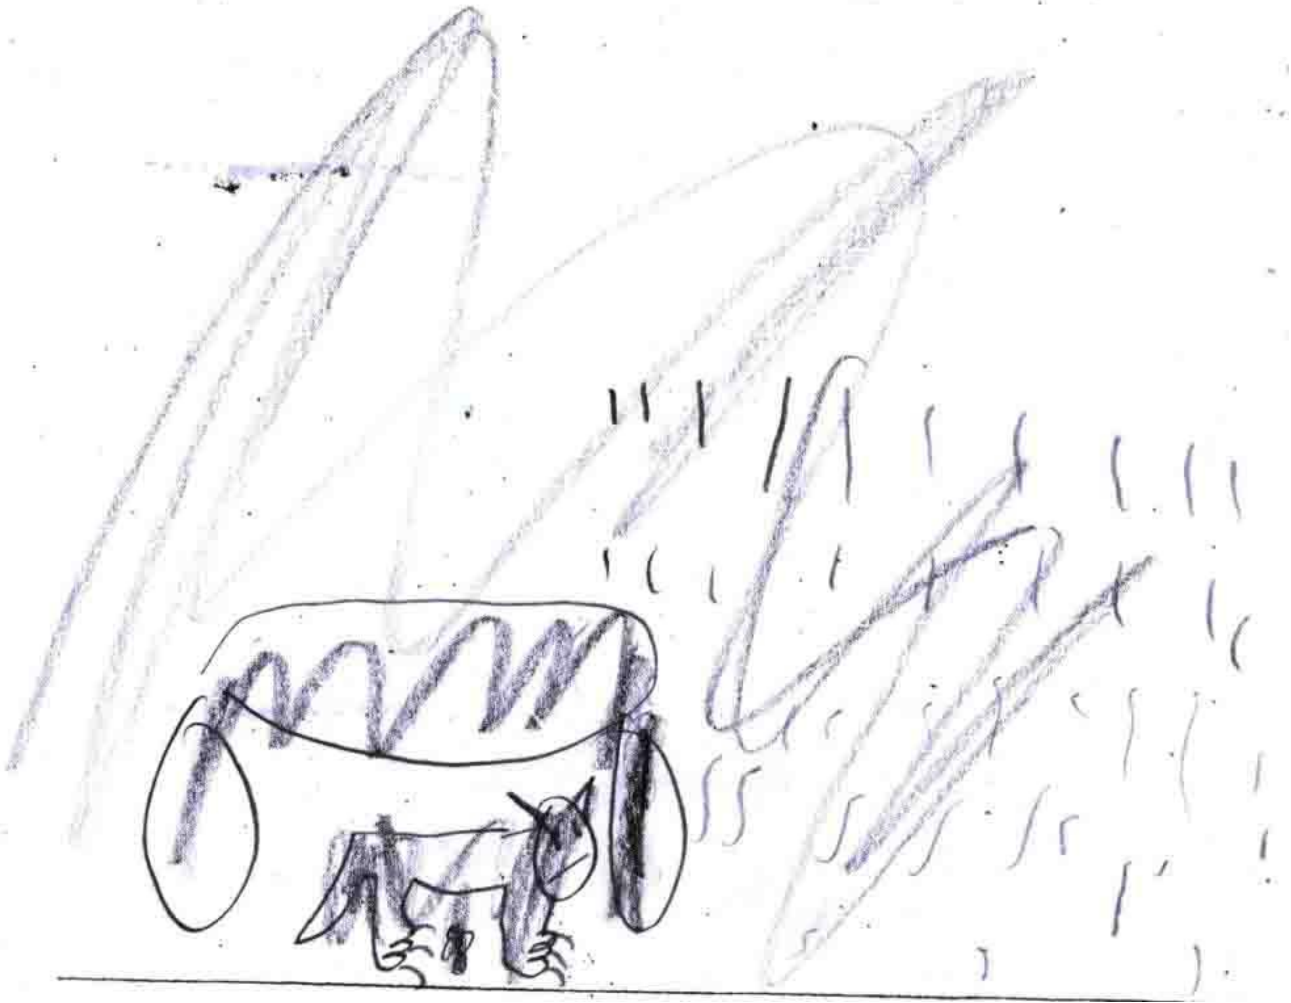

Wolves are cool. There are 200,000 wolves! There are different kinds of wolves: red, white, black, and gray.

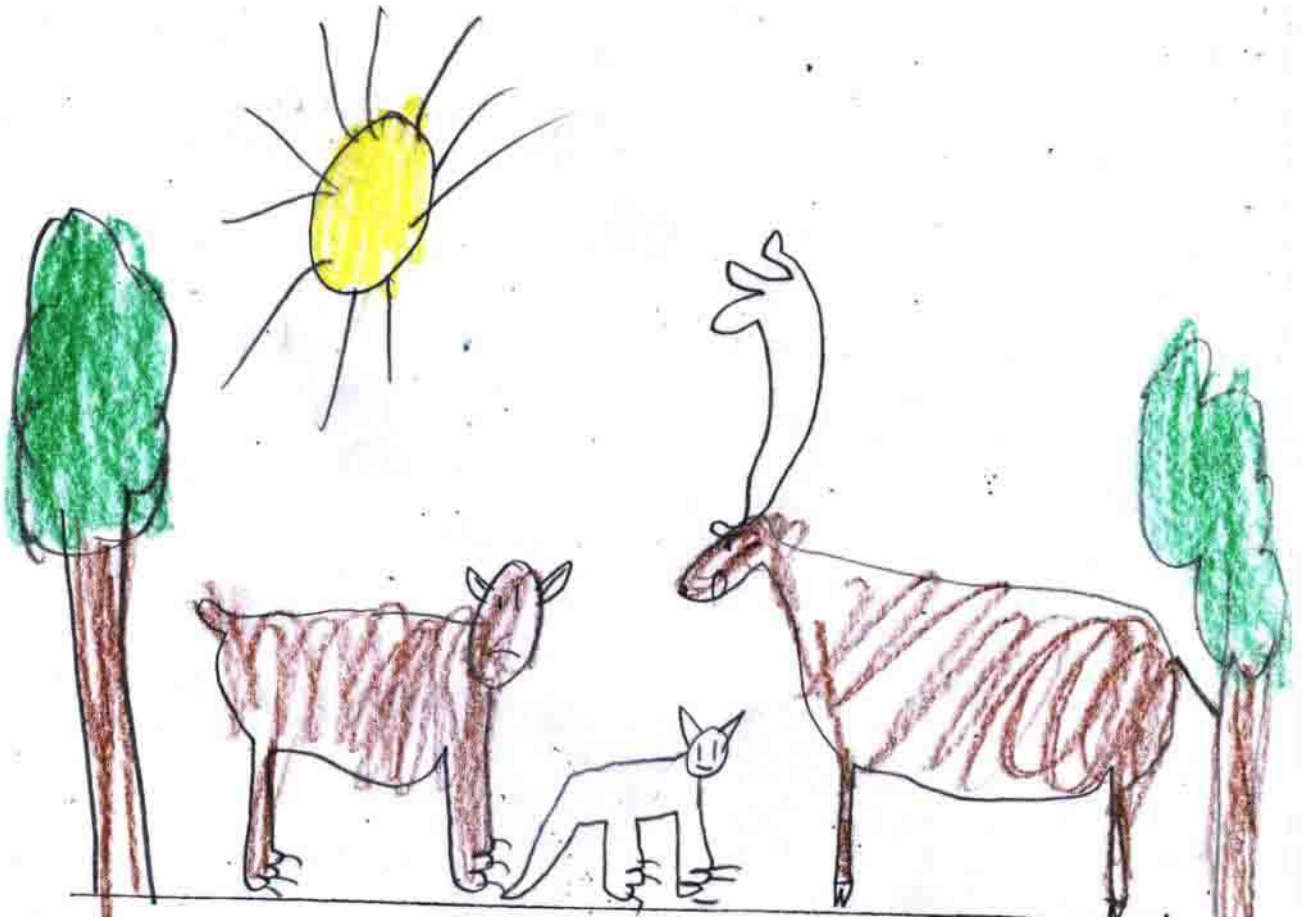

Wolves eat deer, elk, raccoons, fish, otters, and people. Wolves enemies are people.

Wolves have baby pups at the end of winter. Pups can't see or hear when they're born.

Wolves telling is over, bye.

Now the caribou, bears, and
wolves are sad.
