

Super Branch

By: Janelle

Dedicated

to all

Branches

and

apples

Once there laid a branch. His name was Super Branch. He had no friends. He wanted someone to at least play with him for 8 days. But no one would ever play with Super Branch.

Super Branch got very lonely. Suddenly something tapped on Super Branches shoulder. It was an apple and her name was Crystal.

Super Branch thought that Crystal the apple was cute. Crystal thought that Super Branch was sort of cute. Two months later they went to the school dance. They danced together. They had lots of fun!

Super Branch realized that Crystal the apple goes to Super Branch's school. Super Branch was amazed that he'd **just** realized that Crystal the apple went to his school.

Super Branch was horrified!
Super Branch was walking on a
path. The path was covered with
roses. Super Branch ran away
from all of the roses!

Super Branch ran away from all the roses because all the roses reminded him of Love! He ran into Crystal. Crystal fell over and got poked by some thorns from the rose bush. It hurt!

Super Branch went to go get a doctor. It turns out that there is no doctors in town. Super Branch had to fly to Delta.

8

Delta is a very long ways from Colorado. Super Branch lives in Colorado. The doctor came and helped Crystal. Super Branch and Crystal became super good friends. They played thousands of games each day.

But one day Super Branch and Crystal got in a huge fight and became enemies! Super branch and Crystal always glared at each other. They are starting to get annoyed.

Every day they looked at each other they always had to glare! They were not friends any more and were very lonely.

One day they gave up and both decided that they would just have to pretend that they were friends. It worked out pretty well. Super Branch and Crystal were amazed that their idea finally worked. They were no longer pretending, they were friends again!
