Cats come in all sizes like big, small, and medium. Cats can be good friend to dogs. There are all kinds of cats like wild big cats and house cats. Cats have sharp claws and teeth. Cats can have long hair and short hair. Some cats can have stripes or spots. Some cats can roar or meow. Cats come in different colors like white, orange, tan, black, and brown.

Cats can see in dim light. Their pupils open wide to let light enter so they can see in dim light. Cats chase mice and rats. Cats need 5 times more protein than dogs do. Cats drink milk once in a while.

Cats scratch their claws on posts to sharpen their claw and get all of the dirt out of their claws. Cats also scratch to stretch its body and exercise its legs muscles. Cats also scratch to leave its smell on its property. Cats lick their paws and then rub them on their faces.
