

# Bees

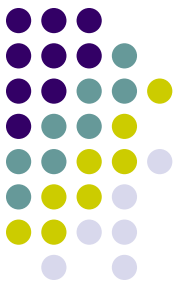

# Hives

- Bees live in colonies and build hives. Bees do different jobs.

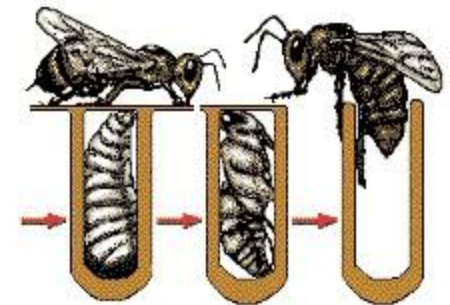

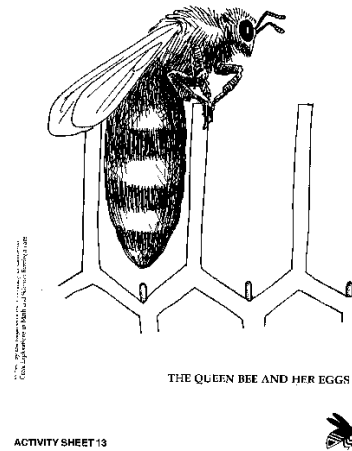

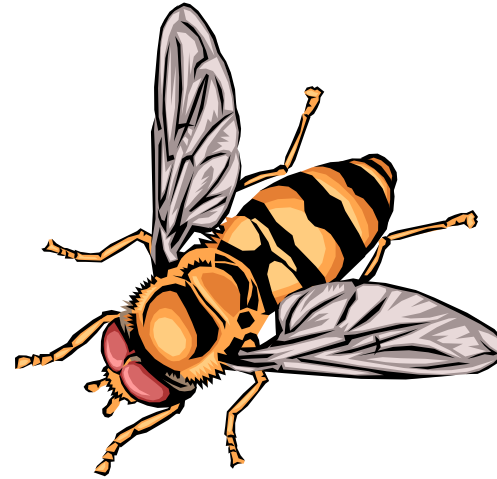

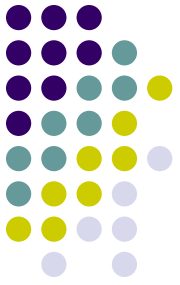

# Worker Bees

- They get nectar from flowers to make honey.
- They build the hive or honey-comb.
- They protect the hive.
- They can sting you.
- They care for the eggs and larvae.
- There are lots of worker bees in a hive.

# Queen Bees

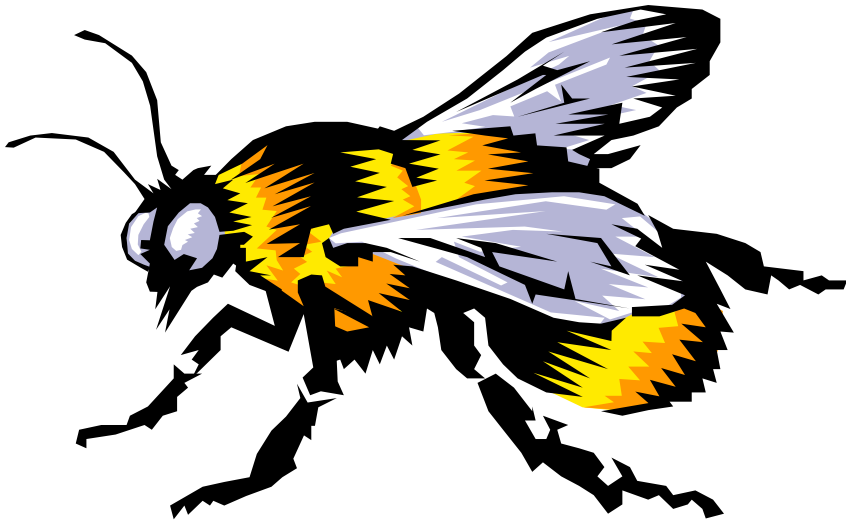

- There is usually only one queen bee in a hive.
- The queen lays eggs.
- The eggs hatch into larvae and eat the honey until they change into a bee.

# Drones

- They mate with the queen to lay eggs.

# Body Parts
