The Khyber Crystal

By Leyton P

(Please know Wookiee's don't talk in English so I will translate as best I can)

Chapter 1

A Wookiee's Pride

It all started at Yoda's Jedi Academy for Young Padawans. I was going to my locker with my older brother Cadana when a note came out.

"What does it say?" asked Cadana.

"It says... *I have been watching you and your brother. I have a mission for you and your brother.*

Location: Jedi Temple

I hope

You will

Be there

-Obi Wan

"Wow!" me and my brother said at the same time. Later, my brother and I left for the Jedi temple

Chapter 2

The Archive

Cadana and I ran through the corridors to the temple. You could not wipe the smile off our faces. When we got in, there was a Jedi.

“I think that’s Obi Wan, though I don’t know for sure,” I said to Cadana.

“Hello I am Obi Wan,” he said.

“I knew it!” I shouted.

“SHHHHH,” Cadana said.

“I want you to do something for me,” Obi Wan said.

“What should we do?” I asked shivering.

“It’s okay Koua we can trust him,” said Cadana confidently.

“Yes, you can trust me,” he said.

“You can understand us?” Cadana asked with surprise.

“Yes I do know how to talk Wookie and you will be making lightsabers,” Obi Wan said as he showed us his lightsaber.

“Wow!” we exclaimed.

“How do you make lightsaber?” I asked.

“In time I will teach you but, there is one thing you need, the materials,” he said.

“Where are the materials?” Cadana asked.

“I have all the materials but one,” he said.

“What is the last material?” I asked.

“The Khyber crystal, the power source of the lightsaber,” he said.

“Where is it?” I asked.

“It’s on the planet that you don’t know about. It is a deep Jedi secret. Follow me to the ship. We will pick up other padawans on our way,” Obi Wan said as we were going to the ship.

Then three more padawans came. They were all Wookies. Kantun was the first one to come. He was a jock and gave me the stank eye. The next one was a girl. She was beautiful and was wearing glasses which was weird for a Wookiee. We Wookiees have good vision. Anyway, her name was Kia (I like her). The last one was a nerd named Loth.

“We’re here,” he said as he pointed to nothing.

“Where’s the ship?” we all asked.

“Right here,” he said.

A w-shaped transport ship uncloaked itself and appeared ten feet in front of us. We boarded the ship and took off.

I said to Cadana, "How long is this going to take?"

"Your guess is as good as mine," said Cadana.

After six LONG days of warp speed we were all tired of each other. Finally we landed on a foresty planet. We walked for a good four hours. Then we stood in front of a large boulder with many strange carvings.

"How do we open it?" Cadana asked.

"By using the force," Obi Wan said.

All the padawans focused the energy and the boulder rolled to the right revealing a cave. All the padawans entered it, except Obi Wan stayed outside.

"What are you doing?" I asked. "Aren't you coming?"

"This is not my mission. I will be waiting out here. But, be warned you will have till sun set to get your crystal and get out. If you don't make it, the rock will roll back, and you will be in there for a week," Obi Wan replied.

Chapter 3

The Cave

The entrance of the cave was black and cold. Surprisingly as the padawans got in farther, a faint fluorescent green slime on the cave walls illuminated a maze of caverns.

“Where are you going?” Kia asked furiously.

“I’m going on my own suckers,” Kantun said proudly and sprinted down a passageway on the right.

“Forget him let’s just go on our own,” I said.

Then we went in to another room with multiple pathways.

“Let’s use the force to decide,” Kia said.

So we used the force and in my mind I was thinking *I hope I get with Kia*. Then when I opened my eyes I was pointing the same direction as Kia. Cadana was with Loth.

Just before Kia and I went in, Cadana whispered “I think you like her.”

“No I don’t,” I said embarrassed.

He just looked at me.

“Okay, yes I do like her,” I whispered back.

“Well make your move,” he said giving me the look.

“No, I’m not,” I said as I walked in left passageway with Kia.

Chapter 4

The Truth

“So what school do you go to?” I asked.

“I’m home schooled,” she said.

“Okay who teaches you? Your mom or your dad?” I asked.

“My dad but he lives somewhere else he’s a Jedi,” she said.

“Is he.....” I started to say.

“What’s that” she said.

“I don’t see anything,” I said.

“It must be my crystal,” she said.

“Well I guess we separate here,” I said.

“Can I tell you something? I like you,” she said.

Then she kissed me on the cheek. My ears were burning like the sun.

“Wow!” I said.

“Bye,” she said giggling.

Then I walked further in to the cave. That’s when I saw it.

“My crystal!” I exclaimed.

There was a fountain right under it. I waded into the fountain a hand grabbed me. Then I don’t know how many more came out but I’m just going to say about 100 more hands. They were pulling me in. I squirmed, kicked, and pulled the hands off me. I barely escape back out of the fountain.

“What the heck was that!!!!?” I screamed. Then I just stood there and I wondered how my brother was doing, if he was having the same kind of problems.

Chapter 5

The Brother

(This chapter is told in the eyes of Cadana)

“I wonder how Koua is doing” I said. Then I saw it, the kyber crystal.

“There it is, that was easy” I said. Then when I grabbed it, it melted because it was ice!!

“Oh come on I thought that was it” I screamed. Then on my way out of there I saw that Loth had his crystal. Then I found another crystal and it was right there.

“Yes the crystal I found it” I said. Then when I grab the crystal it melted.

“Another piece of ice!” I screamed. After 5 more pieces ice I just sat there feeling useless.

“What now?! Every time I find something it’s just a STUPID PIECE OF ICE?!!!” I screamed. Then I punched the wall and pain flowed from my fist and up my arm.

“What would Yoda do? Meditate like always. Well I guess,” I said to out loud to myself.

A minute later part of the ice wall cracked revealing a small tunnel and a strange light.

“Oh sure it looks like a crystal but it’s probably just another piece of ICE” I said. Then I looked closer and it looked different. So I breathed and went in to the little hole in the wall. Then I found it.

“My crystal!” I said with joy rushing through my head. Then not looking, I jumped too high and when I came downWHOOOOOSH.

“OH COME ON!!!” I said as I fell. Then I realized I was trapped.

“HELP!” I screamed a million times. Then I just accepted it. I was trapped.

Chapter 6

The final chance

(This time it will be through Koua)

“Okay I’m going to try again” I thought as walked into the fountain. Then the hands came back. I stepped back out before they could grab me again. I just stood there staring at the fountain and my khyber crystal that was so close.

Wait a minute, this seems familiar. I had this dream when I was very little, I thought. Calm yourself and focus.

Koua closed his eyes and imagined the hands were no longer there. He calmly stepped into the fountain. No hands arose from the water.

Then I realized that they were in my head so, I grabbed the crystal. Right after I grabbed it, Kia walked by. So then I ran too. On my way I found Cadana trapped in an ice cave.

“What are you doing?” I asked.

He said sarcastically, “Oh you know just chilln’ GET ME OUT OF HERE!!!”

“Calm down,” I said.

“How did you get in there?” I asked.

“I found my crystal and then I fell in,” he said.

“Yaw I got my crystal too,” I said.

“Not helping Koua,” he said.

“Oh sorry,” I said.

Then with all the strength I had I used the force to throw a large stone at the ice wall. It broke. Then with a second left they made it out of the cave before it sealed.

“That was a close one” I said. Then Kia hugged me. My cheeks where burning like fire (some body call the fire department). Then my brother gave me the look. Oh come on the look again I thought.

“Well we got the crystal now what” I said.
